# Create, annotate, and share

↳ with Kami

This guide will teach you how to create and share engaging learning resources for your students. It's yours to play with, so ignore the voice in your head saying that drawing on things is bad, and have fun!

Step 1: Create

Nice! You've already achieved the first step by opening this Kami document. Next time you want to create a resource, simply click on the Kami logo in the top left-hand corner to return to the dashboard. You'll find options to open an existing file or create a new one.

Open file

Google Drive | My computer
OneDrive | Kami Library

Create new

Blank page

Google Classroom assignment

Step 2: Annotate

Next, experiment with some of our favorite annotation tools to make your resource more engaging.

T Use the **Text Box** tool to write your name here...

- -

Find the **Markup** tool to highlight this sentence in any color you like.

Add a text comment here using the **Comment** tool.

Tip: If you're feeling bold, try adding a voice or video comment instead!

Step 3: Share

Now you can practice sharing resources with your students. Simply click the big purple **Share** button to open the sharing options (it's as easy as that!).

For step-by-step instructions, click here.

Tip: Sharing is even easier when you connect your **LMS** with Kami! Plus, you'll save loads of time on assessments, feedback, and grading.
