

# The key Kami tools

## You'll find these tools in your toolbar and menu bar

### Select

Activates an annotation and opens further options, like using your cursor.

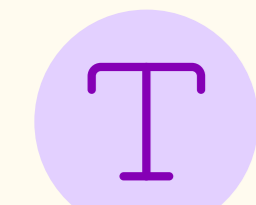

### Dictionary

Highlight a word to get an instant definition — perfect for English language learners or for defining words in English or Español.

### Read Aloud

Select text or hit play to read the entire page. Navigate and change the reading voice, accent, and speed using the playback controls.

### Text box

Choose your font (including dyslexia-friendly), style, and layout, and add hyperlinks, emojis, and formulas. You can even voice type.

### Markup

The Markup tool houses five additional annotation tools:

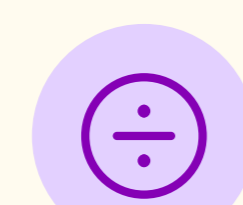

- Text Highlighter
- Freehand Highlighter
- Box Highlighter
- Strikethrough
- Underline

### Comments

The Comments tool houses four communication tools for personalized and timely feedback:

- Text Comment
- Voice Comment
- Video Comment
- Screen Capture

### Equation

The Equation tool allows you to insert fractional, algebraic, and musical symbols. Click anywhere on the page and select the symbol you need.

### Drawing

Adjust stroke thickness, type, and transparency. This tool also houses a further three tools that are great for STEM subjects:

- Ruler
- Protractor
- Compass

### Shapes

Add rectangles, ellipses, triangles, polygons, and lines. Adjust stroke thickness, type, transparency, and color.

### Eraser

Delete All Annotations or Drawings and Shapes only.

### Add media

Add media images from your computer, Google Drive, or One Drive. Take a picture with your camera, search Google Images or YouTube, or add Graphic Organizers and Stickers.

### Signature

Upload an image or sign on your device. You can even add a date and time stamp.

### Questions AI

If your resource includes questions, choose the Convert option. If not, choose Generate. Each option will instantly create editable, autograding questions.

### Annotation bank

Save feedback to use again and again. You can access all your favorites from the sidebar — just drag and drop!

### Split and Merge

Split, merge, add, rotate, and delete multiple pages to create new files.

### Text Recognition

Identify text in scanned or photocopied documents and images. Running text recognition will allow screen readers, like Read Aloud, to work on PDFs.
